

The colony management Spain's Law 7/2023 calls for, solved

CatColony is the platform where the town council, shelters and volunteers manage the municipal feline colony programme together: official census, TNR campaigns and the annual summary, in one place.

WHAT IT SOLVES

Provable compliance

Law 7/2023 requires an ethical colony management programme (census, TNR neutering, microchip identification). CatColony records every obligation with a date and a responsible person.

Official census

One record per cat with photos, chip, ear tip, health and neutering status. The data survives staff and volunteer turnover, and exports to CSV.

Reports and annual summary

A printable municipal report for any period, with month-by-month trends: census, neutering rate, campaigns, citizen reports and spending. The annual summary, in two clicks.

Shelters and neighbours, on board

The organisations already caring for the colonies work in the same tool with roles and permissions. Citizens report incidents through a public portal with a QR poster, instead of calling the town hall.

What Spain's animal welfare law (Law 7/2023) requires

- ✓ Municipal **ethical feline colony management programmes** based on TNR.
- ✓ **Neutering and microchip identification** of community cats.
- ✓ A ban on culling and colony displacement, except on veterinary grounds or justified risk.
- ✓ Collaboration with **animal protection organisations** and caretakers.

UP AND RUNNING IN A WEEK

Guided onboarding: we load whatever census already exists (paper, Excel or another tool), set up the municipality's shelters and train staff in one short session. Data hosted in the European Union, GDPR-compliant and exportable at any time: the census belongs to the council.

ANNUAL PRICE BY POPULATION

Population bracket	Price
Up to 5,000 inhabitants	€490 /year + VAT
5,001 – 20,000 inhabitants	€990 /year + VAT
20,001 – 50,000 inhabitants	€1,990 /year + VAT
Over 50,000 inhabitants	Custom · quote within 48 h

Everything included in every bracket: members, colonies and cats to match the municipality's needs (agreed limits), municipal report, citizen-report portal, public map and support. No separate modules, no surprises.

FRICTIONLESS PROCUREMENT

Annual invoice, paid by bank transfer

One invoice a year in the council's name, no cards or subscriptions: payment by **bank transfer**, like any other council supplier.

A bounded amount

Every bracket stays below the usual direct-award thresholds, and the subscription is annual: if you don't renew there is no further commitment, and you take your data with you.

Guided onboarding

Importing the existing census, setting up shelters and training staff are included in the price. Support in Spanish by email and video call.

Justification report template included

We provide an editable **justification report template** for the procurement file, together with this dossier, at catcolony.app/ayuntamientos.

WHAT THE PLATFORM INCLUDES

- Digital census with photos, chip and microchip search
- TNR campaigns with a target and cat-by-cat progress
- Veterinary history, ailments and treatments
- Printable municipal report with monthly trends
- Public citizen-report portal with a QR poster
- Public colony map for transparency
- Supplies and programme spending tracking
- Roles and permissions for shelters and volunteers
